

Requirements-Online™

www.requirements-online.com

Requirements-Online™ is the on-demand service that improves the performance of your team when specifying requirements for new technology. Use our service and have your team focus on business requirements rather than managing documentation.

Getting Started

Project Details

The background and scope of the work authorized by senior management

Project Details – Requirements-Online supports work on new IT initiatives, as well as enhancements to production systems. Defining the purpose of the Project is the starting point for establishing the scope of the work to be accomplished.

Goals

The strategic initiatives supported through the results of this project

Goals – Do your project teams consistently understand the purpose upon which their efforts are founded? Requirements-Online guides your teams into making the basis of its work explicit.

Business Requirements

Describing the capabilities needed by the organization to achieve its goals

Business Requirements – Provide your teams with a system that helps them articulate your business' needs for new technology.

Functional Requirements

Describing the way that the organization must operate differently in the future

Functional Requirements – Understanding the way that the business will integrate new technology into its operations is critical. Requirements-Online guides your team in clarifying how it will move forward with the introduction of new technology.

Data Sources

The inputs needed by the organization to allow it to operate successfully

Data Sources – Far too often, IT is left to its own resources to identify data sources. Requirements-Online keeps this critical area of work before your entire team so that there is collaboration on this area of work, also.

Features Matrix	Project	Goals	Business Requirements	Functional Requirements	Data Sources
Capture Detailed Information?	Yes	Yes	Yes	Yes	Yes
Add attachments?	Yes	Yes	Yes	Yes	Yes
Specify acceptance criteria?			Yes	Yes	
Document project issues?	Yes				
Track changes in information?	Yes	Yes	Yes	Yes	Yes
Specify business rules?			Yes	Yes	Yes
Reports?	Yes	Yes	Yes	Yes	Yes

Tree Structure

Requirements-Online provides a “nested” view of each Goal and its associated Business and Functional Requirements, and Data Sources.

Right-clicking on any of these items allows the User to start the process of specifying a new requirement or data source.

Status Legend

- Complete – ready for next step
- In progress – more information anticipated
- New – initial information only

Our process footprint is light so you can integrate Requirements-Online™ easily into your process.

Let our service handle the administrative overhead rather than your business and IT managers.

Reports

Project Scope Report

- maintain your project scope and charter

Use Case Report

- work from a report modeled after a standard Use Case template

Goal – Business Requirements

- report on what the business needs to meet its objectives

Business Requirements and Associated Functional Requirements

- report how the organization must change to accommodate its new requirements

Functional Requirements and Needed Data Sources

- give you IT personnel direction on the data sources needed to be successful
